

# Celotex TD4000

## Introduction

Celotex TD4000 provides a quick and easy way to achieve effective thermally insulated flat roof decks for building structures such as small extensions or garage roofs where there will only be occasional trafficking.

TD4000 is 5.5mm WBP exterior grade plywood upper facing bonded to rigid polyisocyanurate foam board, manufactured using zero ozone depletion potential (ODP) blowing agents with low global warming potential (GWP).

With Celotex TD4000 you are specifying an insulation board that:

- Is a three-in-one product to provide deck, vapour control layer and insulation
- Provides reliable long term energy savings for buildings
- Is ideal for use in occasionally trafficked applications
- Provides warm roof construction due to over joist installation
- Is rapidly installed and weatherproofed
- Accepts a wide variety of weathering systems
- Is available in a standard board size of 1200mm x 2400mm

## Applications

Celotex TD4000 is purpose designed for use in light traffic **flat roof** applications.

## Specification Clause

The insulation shall be Celotex TD4000 \_\_\_\_\_mm thick comprising a polyisocyanurate rigid foam insulation core, with a thermal conductivity of 0.022 W/mK, and low emissivity aluminium foil facings on both sides bonded to a layer of 5.5mm WBP exterior grade plywood. Celotex TD4000 is CFC/HCFC free with zero ODP and low GWP. CE marking compliance to BS EN 13165:2001 and manufactured in accordance with quality management systems BS EN ISO 9001:2000 by Celotex Limited. All products must be installed in accordance with instructions issued by Celotex Limited.

## Sustainable Insulation

Celotex PIR insulation has been independently assessed by BRE Global and has been accredited with an **A+ rating** when compared to the BRE Green Guide 2008.

The results also show that Celotex offers a lower environmental impact than other typical PIR manufacturers.
